

SKYSLOPE

PAPERLESS TRANSACTION MANAGEMENT

With SkySlope's easy to use checklists and log, you will be more compliant than ever, allowing more time to focus on things that matter most, such as growing your business.

Transaction Checklist

Every state has disclosures and contracts specific to them. Furthermore, every type of transaction or listing has its own unique set of required documentation. This ensures that no files are closed without all the required documentation for that specific property.

Digital Footprint

SkySlope's log keeps a digital footprint of everything that is done within the platform. This includes all emails from any party associated with the transaction. This digital footprint ensures that there will be no future discrepancies regarding a closed transaction.

Email & Text Message Tracking

Each transaction in SkySlope has its own property specific email address and email tracking. This makes saving all correspondence pertaining to a transaction effortless. With the recent release of our mobile app, SkySlope is currently the only platform on the market that has text message tracking. This feature is a must have for all brokers looking to remain compliant.

Agent Mobile App

To be successful in today's real estate market, an agent needs to have access to all of their files and contacts via their mobile devices. SkySlope recognizes this and created their apps to ensure any contact, transaction, or file is only one click away on any device.

DigiSign

Digital signing is quickly becoming both agents' and clients' preferred method for signing all contracts and disclosures. SkySlope has developed its own fully integrated e-signing platform called DigiSign. Applying signatures to any contract or disclosure is as simple as dragging and dropping signature blocks. DigiSign follows all the criteria required by both the E-SIGN Act as well as the European Union's Directive on eSignatures.

Support

SkySlope knows that brokers, agents, and staff are working around the clock and don't have time to wait for answers. Therefore, SkySlope's industry leading support guarantees that there will be a representative available 24/7, to answer questions instantly via live chat, phone, or email.
